Dickinson Dining Services
Scheduling Made Easy

Current Scheduling Method

- 250 student workers
- Current scheduling done by Student Manager
- Multiple changes made daily
- Waste of paper

Current Sub Request Method

- Uses Moodle as a blog
- Sub request blog fills up quickly
- Requires Student Workers to post in specific format
- Difficult to navigate

Moodle...

Scheduling Made Easy...

- Combine scheduling and sub requests into a single web application!

Three Main Functionalities...

- Interface for entering and removing Student Workers from the schedule

- The most comprehensive and up-to-date schedule available

- Easy and convenient way for workers to request subs

Some Key Features...

- Search for names, dates, open positions, and subs
- Automated e-mail confirmation
- Request a sub by clicking a single button
- Accept a sub by clicking a single button
- Current schedule will always be displayed

Tools...

- NetBeans IDE 6.9
- GlassFish Server Open Source Edition 3.0.1
- Java DB (Apache Derby)
- JavaFX
- Java EE

?!?!?!?!?!?!?!?!?!?!?!?!?!?!?!?!

Questions?
