

AI class announcements, Tuesday
November 13, 2012

Plan for today

- I've lost my voice, so no lecture today
- Instead, YOU present the material
- first 25 minutes: study the lecture notes
 - pay special attention to the part highlighted in yellow on your own copy of the handout
 - don't bother with the appendix (you will probably need it for the programming assignment, however)
- remaining time: each student presents the highlighted portion of his/her notes
- if any time left after that: individual work on programming assignment 4
- I'm available to answer questions, of course, so don't hesitate to ask

Other announcements

- Exam next Tuesday
 - Details on web page.
 - Let me know of any questions.
 - Solutions to all sample problems are on Moodle
- Programming assignment 4 is available.
 - Thursday's class is a lab for assignment 4
 - Download the code and read the documentation *before* class on Thursday, so you have useful questions prepared in advance
- Start thinking about final project *now*
 - Details on web page.
 - First milestone is due 11/29
