

**COMP251 Writing Assignment, Part 1B:
Revision of Technical report
(50 points)**

For this assignment, you should revise and improve your report from Part 1A. Pay particular attention to feedback received from the peer review session and from the instructor's grading of Part 1A. Add an appendix to your report, describing the changes and improvements you made. The length of this appendix should be about half a page. All other requirements for the assignment remain the same, except that the total permitted length is increased to 4-5 pages, excluding the appendix. The grading of Part 1B will use the same rubric as for Part 1A, except that significant weight will be given to the *revisions* and *improvements*. If you received a high grade for Part 1A, you must still significantly revise and improve your document. One way to achieve this is to add more content.
